Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 18-22, and 28-32 drawn to a method, a processor readable medium, and an apparatus for generating at least one LO signal and at least one baseband signal based on a received RF signal and two received signals with different frequencies, classified in class 455, subclass 323.
 - II. Claims 6-9, and 23-27, drawn to a wireless communication device with its detailed components such as a downconverter and a modem, classified in class 455, subclass 557.
 - III. Claims 10-12, and 13-17, drawn to a demodulator and an integrated circuit with its details components as a quadrature signal generator, two mixers and a modem for generating I and Q baseband signals, classified in class 329, subclass 306.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I

Art Unit: 2685

drawn to a method, a processor readable medium, and an apparatus for generating at least one LO signal and at least one baseband signal based on a received RF signal and two received signals with different frequencies. The subcombination has separate utility whereas invention II is about a (separate) wireless communication device with its detailed components such as a downconverter and a modem; and whereas invention III is about a (distinct) demodulator and an (same) integrated circuit with its details components as a quadrature signal generator, two mixers and a modem for generating I and Q baseband signals. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and for Group III, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
